20130419 Response to NJDEP 20130412 Comments.pdf
RM 10.9 Sediment Porewater Data.pdf

Stephanie:

Here's a summary of the validated target COPCs observed in RM 10.9 pore water composite samples 1 and 2. These COPCs are the focal point of the RM 10.9 RM Validation of Pore Water Comp 3 should be complete early next week.

Validated Comp 1 and 2 pore water data were included in our April 17 data submission to you and CDM. This submission also contained validated D/F data for Pore Water Comp 3.

We will be able send you a complete validated pore water data set next week.

Additionally, the response to NJDEP comments on the CPG's Waterfront Development Permit-equivalent application with the draft WQMP is attached for your weekend reading!!

Have a great weekend.

Bill P.
